

05 Local Transportation Policy

India-focused synthetic enterprise reference policy | Version 1.0 | Effective 01 January 2026

PROVENANCE: This is a synthetic reference implementation created for RAG development. It is not an actual company policy. Production use requires replacement with the adopting company's approved policy, limits, grades and approval matrix.

1. Scope, Purpose & Definitions

Purpose

This policy establishes a controlled framework for authorizing, booking, paying, documenting and reimbursing business travel and related expenses in India and for international business trips originating in India.

Business travel must be necessary, reasonable, economical and connected to an approved business purpose. Limits are ceilings, not spending targets.

Where this policy refers to an approved channel, supplier, rate card, employee grade or approval authority, the production organization must populate those values from its current controlled source.

Definitions

Business trip means approved travel away from the employee's normal work location for company business. Domestic travel means travel within India; international travel means travel crossing an international border.

Per diem means a fixed daily allowance where the applicable rate card permits fixed-rate reimbursement instead of actual documented meals.

Personal expense means a cost primarily for personal convenience, leisure or private travel and is not reimbursable unless expressly allowed.

Core controls

Employees must not split, duplicate or deliberately misclassify expenses to avoid a limit or approval requirement.

An approved expense must still satisfy the applicable policy rule. Manager approval does not convert a prohibited expense into an eligible expense.

Questions requiring live information such as airline schedules, current exchange rates or current tax law should be answered using the relevant live system rather than a static policy.

4. Rail, Bus & Intercity Road

Rail

Rail may be selected when practical, safe and cost-effective compared with air travel. Eligible class is determined by the grade/rate matrix.

Business-related cancellation charges are reimbursable when the cancellation was caused by an approved business change.

Road

Approved intercity taxis, buses and hired cars may be used when rail or air is impractical.

Self-drive intercity travel requires prior approval and compliance with vehicle, insurance and safety requirements.

Fuel, tolls and parking for approved business travel are reimbursable when supported by receipts or an approved mileage method.

7. Local Transportation

Taxi, app cab & public transport

Reasonable taxi, app-based cab, metro, bus and other public transport are reimbursable for approved business travel.

Uber, Ola and comparable services may be used where available, subject to the approved service level and documentation requirements.

Premium or luxury ride categories require a business justification or exception approval.

Rental cars

Rental cars may be used where practical or economical for the business need, including when transporting equipment or multiple travelers.

Compact or standard vehicles should normally be selected. Fuel, tolls, parking and approved rental insurance are reimbursable.

Traffic fines and personal violations are not reimbursable.

Personal vehicle

Business use of a personal vehicle may be reimbursed using the approved mileage rate or eligible actual costs, but not both for the same distance.

Claims should include date, origin, destination, business purpose and distance. Home-to-office commuting is excluded.
